Tab 2

Campaign Strategy: IICT India n8n Training

1. Campaign Overview

IICT India teaches n8n online. n8n is a tool that does boring computer work by itself, with no coding. Classes are in Hindi. We will run paid ads to get interested people (leads) and turn them into students.

Course fee: 199, Duration: 1hr/ 3days, Mode: online live, language: hindi

2. Campaign Goals

- Main goal: get leads for the free demo class and turn them into students
- First month estimate: 150 to 300 leads and about 8 to 15 students (guess)
- Cost per lead (CPL): 150 to 300 rupees (guess)

3. Target Audience

- Age: 18 to 45
- Places: Delhi NCR, Maharashtra, Gujarat (main focus). Uttar Pradesh and Karnataka (smaller focus). Tamil Nadu (small test).
- Main cities: Delhi, Noida, Gurgaon, Mumbai, Pune, Nagpur, Ahmedabad, Surat, Vadodara, Rajkot, Lucknow, Kanpur, Bangalore, Mysore, Chennai, Coimbatore
- Gender: all. About 70 men and 30 women out of 100 (guess, we will check real data)
- Language: Hindi
- Who will apply mostly: students, freshers, office workers, freelancers, and small business owners

4. Audience Groups

- Group A: Students and freshers (18 to 26). Want a job skill.
- Group B: Office workers (25 to 40). Want to save time and grow in their job.
- Group C: Freelancers and business owners (24 to 45). Want to earn more or save time.

5. Audience Pain Points and Needs

- Pain points: they think coding is hard, they waste time on the same work every day, they cannot make real projects, they are afraid of fake courses and English courses feel difficult.
- Needs: learn in easy Hindi, real projects, certificate and a way to find work or earn money.

6. Competitor Analysis

Other n8n course sellers are ADMEC, TGC India, Inspizone, ShifttoTech, and n8ntraining.in. They all talk about certificates, real projects, and no coding. Most of them advertise in English. Our classes are in Hindi and we will show real student projects. Check their ads in the Meta Ad Library.

7. Platform Selection

- Meta (Instagram and Facebook): main platform for lead ads
- Google Search: for people already searching for the course
- WhatsApp: to talk to leads after they sign up

8. Campaign Structure

- People who do not know us: Campaign 1
- People who show interest: Campaign 2 and Campaign 4
- People who visited but did not sign up: Campaign 3

9. Campaigns

Campaign	Platform	Objective	Job
Campaign 1	Meta	Video views	Tell people about n8n and IICT
Campaign 2	Meta	Leads	Get sign-ups for the demo class
Campaign 3	Meta	Leads	Show ads again to people who visited or watched
Campaign 4	Google	Leads	Catch people searching for the course

10. Ad Sets and Targeting

- Campaign 1 (2 ad sets): (a) students and freshers, (b) office workers and freelancers. Hindi language, all six states.
- Campaign 2 (3 ad sets): (a) students and freshers 18 to 26, (b) office workers 25 to 40, (c) freelancers and business owners. Interests: online learning, freelancing, AI tools, digital marketing, IT jobs.
- Campaign 3 (2 ad sets): (a) people who watched 50 out of 100 of our video, (b) people who visited the website in the last 30 days.
- Campaign 4 (2 ad groups): (a) "n8n course", "n8n training India". (b) "n8n course in Hindi" and city words like "n8n course in Delhi".

11. Keyword Strategy (Google Ads)

n8n course, n8n training India, n8n course in Hindi, n8n kaise seekhe, automation course Hindi me, n8n course with certificate, n8n course in Delhi, n8n course in Mumbai, n8n course in Ahmedabad.

12. Ad Types and Placements

- Video ads (Reels and Feed), 15 to 30 seconds: main type
- Photo ads: one simple message
- Carousel ads (slides): course topics and student projects
- Instagram and Facebook lead form, and website form
- Placements: Instagram Reels, Feed, Stories, and Facebook Feed

13. Ad Creative Plan

- Each Campaign 2 ad set starts with 3 ads. Total 9 ads: 5 videos, 2 photos, 2 carousels.
- Hook ideas (first 2 seconds):
 - "Roz ka ye boring kaam manually karte ho?"
 - "Bina coding ke automation seekho, Hindi me!"
 - "Fresher ho? Ye skill tumhe alag banayegi."
- Call to action (one in each ad): "Free demo class register karo" or "WhatsApp karo"

14. Sample Ad Copy

- Headline: "n8n Automation Hindi Me Seekho"
- Text: "Bina coding ke apna kaam automatic karo. Live Hindi classes, real projects, certificate. Free demo class me aao."
- Button: "Sign Up" or "WhatsApp Us"
- For freelancers: "Client ka kaam automate karo aur apni service bech ke kamao. Free demo class register karo."

15. Landing Page and Lead Form

- Page shows: demo video, course topics, fee, batch date, student reviews, sign-up form and WhatsApp button
- Form asks only: name, phone number, city

16. Budget Plan

Total: 50,000 rupees for the first month. About 1,667 rupees per day. We do not spend it all at once.

Campaign	Phase 1 (Week 1 to 2)	Phase 2 (Week 3 to 4)	Total
Campaign 1	3,000	7,000	10,000
Campaign 2	9,000	16,000	25,000
Campaign 3	0	8,000	8,000
Campaign 4	3,000	4,000	7,000
Total	15,000	35,000	50,000

Money per day (about):

- Phase 1: Campaign 1: 215. Campaign 2: 640 (about 215 per ad set). Campaign 4: 215.

- Phase 2: Campaign 1: 500. Campaign 2: 1,143 (about 380 per ad set). Campaign 3: 571. Campaign 4: 286.

Money split by state (lead campaign):

- Delhi, Maharashtra, Gujarat: 60 out of 100 rupees
- Uttar Pradesh and Karnataka: 30 out of 100 rupees
- Tamil Nadu: 10 out of 100 rupees

17. Budget Calculation (all guesses)

- Cost of one lead (CPL): 150 to 300 rupees
- Leads = money ÷ CPL. $50,000 \div 300 = \text{about } 166$. $50,000 \div 150 = \text{about } 333$.
- Expected leads: about 150 to 300
- Guess: 5 out of 100 leads join the course
- Students: 150 leads gives about 8. 300 leads gives about 15.
- Cost of one student: $50,000 \div 15 = \text{about } 3,300$ rupees, to $50,000 \div 8 = \text{about } 6,250$ rupees
- Ads also have 18% GST added, so the real cost is a bit higher
- After Phase 1, we replace these guesses with real numbers

18. Bidding and Schedule

- Meta: start with "lowest cost" (automatic). Google: start with "maximize clicks".
- Run ads all day at first. After 2 weeks, check which hours and days work best.

19. Retargeting

Show ads again to people who watched our video, opened our page, or started the form but did not finish. Message: "Demo class ki seats limited hain" or a student review.

20. Lead Follow-up

- Call or WhatsApp the lead within 15 minutes to 1 hour, in Hindi
- Invite them to the free demo class
- After the demo, send fee details and the batch date

21. Tracking Setup

- Meta Pixel and Google Analytics on the website
- Conversion events: form submit and WhatsApp click
- UTM links on every ad, so we know which ad gave which lead

22. KPIs (Numbers We Watch)

- Reach and video views (Campaign 1)
- Click rate (CTR)
- Cost per click (CPC)
- Cost per lead (CPL)
- Lead to demo class rate
- Demo class to student rate

- Cost per student

23. A/B Testing

Change one thing at a time: the first line (hook), the picture or video, the button text, the audience, or the landing page.

24. Optimization Rules

- After 3 to 4 days: stop ads with very few clicks
- After 2 weeks: stop ad sets with a cost per lead much higher than planned
- Add 20 out of 100 more money every 3 days to ad sets that give leads for less money than planned
- Make more ads like the winners
- Change the picture or first line every 2 to 3 weeks

25. Reporting

- A small report every week: money spent, leads, cost per lead, best ad
- A full report at the end of the month with learnings and next month's plan

26. Risks and Limits

- CPL may be higher than our guess, because big cities cost more
- Some leads may be fake or not serious, so we will call and check quality
- All numbers are estimates and will be updated after the test

27. Action Plan

- Week 1: Set up Pixel, Analytics, landing page, and lead form. Make 9 ads and Google ads. Start Phase 1.
- Week 2: Watch results daily. Stop weak ads.
- Week 3: Start Phase 2. Add money to winners. Start retargeting.
- Week 4: Follow up on leads, check results, and plan next month.
